Sir:

Please amend this application as set out below.

In the claims

~~Amend~~ claim 1 to read:

1. (Amended twice) A method of reducing the sulfur content of a catalytically cracked petroleum fraction, which comprises catalytically cracking a petroleum feed fraction containing organosulfur compounds at elevated temperature in the presence of a cracking catalyst and a product sulfur reduction catalyst which comprises a porous molecular sieve having (i) a first metal component which is within the interior pore structure of the molecular sieve and which comprises vanadium in an oxidation state greater than zero and (ii) a second metal component which is within the interior pore structure of the molecular sieve and which comprises at least one rare earth, in a matrix comprising alumina or silica-alumina with clay to produce liquid cracking products of reduced sulfur content.
